

機械式壓力開關也可以做到無應差(設定零壓差)嗎??

是可以的, 禾豐開發之隔膜式壓力開即為設定零壓差(無應差)機械式壓力開關, 適用流體空氣 水及油, 使用壓力 10BAR, 設定壓力 0.25-5BAR, 方便且性能佳, 壽命長, 成本低, 成本比一般彈簧機械式壓力開關還低, 是您最佳的選擇

**Mechanical pressure switch can also be the difference (set to zero pressure)??**

Is the the Hefeng development of diaphragm-type pressure opening is set zero pressure (no difference) and a mechanical pressure switch, suitable for fluid air-water and oil, the use of pressure 10BAR set pressure 0.25-5BAR, convenience and good performance. long life, low cost, the cost is lower than the average spring mechanical pressure switch is your best choice
